This has been one year with no spring weather attached. Just the spring months; that's all. As soon as the tentacles of winter were released we

were permitted to drop plumb into the middle of summer and forthwith began mopping our brows to dry up the miniature salt seas that had collected thereon. Indications point to a continuation of the struggle with the heat monster for sometime to come.

May 29. Harry Hukes.

We fear the business men of our town do not fully realize what a good thing for the boys this scout movement is or they would lend it more encouragement in the way of providing quarters in which it can meet and in other ways lending aid and encouragement.
